## Projects

---

### Construelectric JV S.A.S

- Developed a visually appealing landing page for a Chilean electrical and plumbing company, showcasing expertise in front-end development and user-centric design.
- Implemented robust SEO strategies resulting in consistent ranking within the first 5 results on Google for targeted search queries, significantly enhancing the online visibility and reach of the client's business.
- Maintained active and effective communication with the client, showcasing strong interpersonal skills. Translated client requirements into actionable development tasks, ensuring a seamless and collaborative workflow.
- Leveraged client interactions to enhance soft skills, contributing to a positive working relationship and successful project outcomes. Developed the ability to understand and fulfill client needs promptly and efficiently.
- Collaborated with a design-oriented team member, sharing technical insights and coding knowledge. Facilitated the integration of design skills into web development, contributing to the overall success of the project. Played a pivotal role in mentoring and supporting a colleague who was starting her studies in software development.

## Interests

---

- I love science, with a special affinity for biochemistry, physics, and astronomy. I can dedicate entire days to learning about this topics. As a developer, one of my primary life goals is to create educational video games for schools in my country. This initiative aims to help schools face challenges due to limited access to laboratories or other facilities, providing innovative solutions for effective teaching.
- Music holds a significant place in my identity. Whether it's listening to or attempting to create it, from whistling to playing the guitar, I view this as a crucial aspect of my personality.
